Important COVID-19 Vaccine Information (June 21, 2021)

Dear Patients,

As many of you know, New Vision Family Health Team has supported the region in its effort to get as many residents vaccinated as soon as possible. **To date our FHT has vaccinated more than 7500 people in our community!** We could not have done it without our staff and physicians, as well as our volunteers – a big thank you to them for keeping our residents calm, organized, and cared for while they navigated their way through our clinic to receive their vaccine.

Pre-Registration:

Reminder - Everyone 12 years old and up can pre-register for the COVID-19 vaccine through the Region at:

<https://www.regionofwaterloo.ca/en/health-and-wellness/covid-19-vaccination-pre-registration.aspx#>

Second Dose Information:

The province has opened up eligibility for a shortened interval between first and second doses of the vaccine for certain eligible groups.

Anyone eligible for an earlier second dose who wants to receive their second dose at a shortened interval is asked to complete the second dose rebooking request form at:

<https://www.regionofwaterloo.ca/en/health-and-wellness/second-dose-information.aspx>

Feedback/Surveys:

Vaccine Clinic Questionnaire:

The Region of Waterloo has implemented a client feedback survey to help evaluate regional COVID-19 clinics and obtain feedback on client experience and satisfaction. Whether you have had your COVID vaccine at New Vision FHT site or another location, it would be helpful if you could provide your feedback. If you would like to complete the Vaccine Clinic Questionnaire please visit:

<https://surveys.regionofwaterloo.ca/?e=229621&h=188790F3CE2FBA9&l=en>

Social Determinants of Health Questionnaire

The Ministry of Health is collecting information on race, ethnic origin, income, household size, and language from people who receive a vaccine for COVID-19. Collecting this information will help our province understand the characteristics of individuals who receive a vaccine for COVID-19. This information will help:

- Ensure that everyone has equitable access to vaccines.
- Determine where information can be improved, so that individuals have the facts they need to make informed decisions about vaccination.

If you would like to complete the Social Determinants of Health Questionnaire, please visit: <https://surveys.regionofwaterloo.ca/?e=225127&h=9CC5CC357FBCEF8&l=en>.

Please continue to visit our website for more information. Stay well!

Sincerely,

New Vision Family Health Team
