New Vision News - COVID-19 Vaccine Update

July 13, 2022

Dear patients,

The Chief Medical Officer of Health has announced the expansion of 4th doses (2nd boosters) to all adults aged 18+, effective July 14th. This means that Ontarians between 18 and 59 years old who had a first booster shot at least five months ago will be able to receive a second COVID vaccine booster. It must also be at least three months since a COVID-19 infection.

At New Vision, we will be providing limited appointments for a COVID-19 vaccine during the month of August. The vaccine we are offering at this time is Pfizer. Please continue checking our website for details on these upcoming clinic days.

COVID-19 vaccines authorized by Health Canada are safe, reliable, and can help protect you, your family, and our community from COVID-19. All patients are strongly encouraged to stay up to date on their current COVID vaccinations to ensure protection against COVID-19 during this 7th wave.

PLEASE NOTE: We will be holding a pediatric COVID vaccine clinic on Friday, July 29th from 9 AM to 12 PM for patients ages 5 to 11. If you would like to book an appointment, please call us at 519-578-3510.

New Vision Providers and Staff will continue to wear masks and strongly encourage all patients to do so as well. Patients experiencing symptoms such as a cough, fever, congestion, runny nose and/or sore throat are **required to wear masks**. We ask that patients continue to do the self-screener posted in the office and notify staff so appropriate PPE and infection control protocols are implemented.

Please continue to visit our website at www.newvisionhealth.ca for more updates.

Thanks,

New Vision Family Health Team
